

# Andrea Bocchieri

✉ andrea.bocchieri@uniroma1.it | 🌐 andreabocchieri.com | 🐙 GitHub | 🆔 ORCID | 📄 Google Scholar | 📡 NASA/ADS

**Telescope Scientist** for ESA's *Ariel* mission specialising in exoplanet characterisation through spectroscopic observations, data analysis, optimisation of space instrumentation, especially optical aspects, and control of experimental systematics.

## APPOINTMENTS

- |  |                |
|--|----------------|
| • <b>Research Associate</b> , CNR-IFN - Padova                         | 2025 – Present |
| • <b>Telescope Scientist</b> , ESA's <i>Ariel</i> Space Mission        | 2024 – Present |
| • <b>Research Associate</b> , INAF - Arcetri Astrophysical Observatory | 2024 – Present |
| • <b>Postdoctoral Fellow</b> , Sapienza University of Rome             | 2023 – Present |

## EDUCATION

- |   |             |
|---|-------------|
| • <b>Ph.D. in Astronomy, Astrophysics and Space Science</b> , Sapienza University of Rome                       | 2020 – 2023 |
| Summa cum Laude – <i>Characterisation of the Atmospheres of Extrasolar Planets with the Ariel Space Mission</i> |             |
| • <b>M.Sc. in Astronomy and Astrophysics</b> , Sapienza University of Rome                                      | 2018 – 2020 |
| Summa cum Laude – <i>Learning from Exoplanetary populations: Data Analysis for the Ariel Space Mission</i>      |             |
| • <b>B.Sc. in Physics</b> , Sapienza University of Rome   | 2015 – 2018 |

## LEADERSHIP AND SERVICE

- |   |                |
|---|----------------|
| • <b>Member</b> – GAPS Collaboration  | 2025 – Present |
| • <b>Founder, coordinator</b> – <i>Ariel</i> Stellar Obliquity WG                             | 2025 – Present |
| • <b>Chair</b> – <i>Ariel</i> Telescope Assembly Mounting-Correlation Working Group           | 2025 – Present |
| • <b>Member</b> – <i>Ariel</i> Instrument Scientist Team as the Telescope Scientist           | 2024 – Present |
| • <b>Member</b> – <i>Ariel</i> Telescope Assembly Project Office                              | 2024 – Present |
| • <b>Chair</b> – <i>Ariel</i> Telescope Assembly Tiger Team                                   | 2024 – Present |
| • <b>Member</b> – <i>Ariel</i> Data Challenge organising team                                 | 2024 – Present |
| • <b>Coordinator</b> – <i>Ariel</i> -IT Dry Run simulations and retrievals                    | 2023 – Present |
| • <b>National contact</b> – Exoclock Collaboration  | 2023 – Present |
| • <b>Member</b> – <i>Ariel</i> Instrument Operations & Science Data Centre Working Group      | 2022 – Present |
| • <b>Chair</b> – <i>Ariel</i> Simulators Software, Management and Documentation Working Group | 2022 – Present |
| • <b>Member</b> – <i>EXCITE</i> Team and Data Analysis Working Group                          | 2021 – Present |
| • <b>Chair</b> – <i>Ariel</i> Science Brainstorms Working Group                               | 2021 – 2024    |
| • 12 peer-reviewed journal articles as author or co-author; 6 submitted                       |                |
| • 41 conference proceedings, 10+ technical notes, 4 invited talks, 13 observing proposals     |                |
| • 4 observing nights at TNG with HARPS-N and GIANO-B  |                |

## TECHNICAL SKILLS

- |   |  |
|---|--|
| • <b>Programming:</b> Python, C, Git, Bash, LaTeX | • <b>Codes:</b> ExoRad2.0; ExoSim2.0; Alfnoor; TauREx3.x                 |
| • <b>Software:</b> Office Suite, Adobe Suite      | • <b>OS:</b> Linux (Ubuntu, Debian), Windows, macOS                      |
| • <b>Optical design:</b> Zemax OpticStudio; PAOS  | • <b>Linux server administration:</b> <i>melodie</i> and <i>flounder</i> |

## SELECTED PUBLICATIONS AND PROJECTS

---

- **Bocchieri et al.** (2025). *ExoNAMD: Leveraging the spin-orbit angle to gauge multi-planet systems*. Submitted to A&A
- **Bocchieri et al.** (2025). *Exploring Synergies between Twinkle and Ariel: A Pilot Study*. Submitted to Exp. Astr.
- **Bocchieri et al.** (2025). *De-jittering Ariel: an optimised algorithm*. Exp. Astr.
- Mugnai+**Bocchieri et al.** (2025). *ExoSim 2.0: the new Exoplanet Observation Simulator [...]*. Exp. Astr.
- Changeat et al. (2025). *On the synergetic use of Ariel and JWST for exoplanet atmospheric science*. arXiv
- **Bocchieri et al.** (2024). *PAOS: a fast, modern, and reliable Python package for Physical Optics studies*. SPIE
- Zak+**Bocchieri et al.** (2024). *Stellar obliquity measurements of six gas giants*. A&A
- Mugnai+**Bocchieri et al.** (2024). *ExoRad 2.0: The generic point source radiometric model*. JOSS
- **Bocchieri et al.** (2023). *Detecting molecules in Ariel low resolution transmission spectra*. Exp. Astr.
  
- **Creator, maintainer** – **PAOS**: Generic physical optics model of wavefront propagation through complex space telescopes.
- **Creator, maintainer** – **ExoNAMD**: Codebase to compute the Normalised Angular Momentum Deficit of planetary systems.
- **Creator, maintainer** – **STOP-utils**: Utilities for wavefront error analysis using externally simulated error maps.
- **Creator, maintainer** – **TIGRO**: Tool analysing interferometric surface error measurements with nanometer precision.
- **Creator, maintainer** – **taurex-emcee**: A plugin for TauREx 3.1 that provides the Emcee sampler for the retrieval.
- **Co-creator** – **ExoRad2.0**: Generic radiometric point source simulator of exoplanet observations.
- **Co-creator** – **ExoSim2.0**: Generic time-domain point source simulator of exoplanet observations.
  
- Interferometric testing of Ariel M1 structural model of the 1.1 m aluminium primary mirror (May – August 2024).

## GRANTS AND AWARDS

---

- **Organiser** – *Ariel Data Challenge* - NeurIPS, Kaggle [\$100,000] 2024, 2025
- **Co-PI** – INAF USC VIII - Ariel-IT Dry Run: simulation and retrieval [3 M CPUh] 2023
- **PI** – Avvio alla Ricerca - Sapienza University of Rome [\$4,000] 2022, 2024
- **Collaborator** – Progetti di Ricerca - Sapienza University of Rome [\$50,000] 2021, 2022, 2023, 2024
- Winner of the *Excellence track* during M.Sc. - Sapienza University of Rome 2020

## OBSERVING PROPOSALS

---

1. **LBT** (PI) 2025  
*The evolutionary history of the  $\sim 60$  Myr multiplanetary system TIC 434398831*  
Instrument: PEPsi, Telescope time: **6.1h**
2. **ESO/VLT** (Cycle P116, dPI) 2025  
*Cliff Hanger system TOI-942: aligned or misaligned orbit? Escaping or stable atmosphere?*  
Instrument: ESPRESSO, Telescope time: **6h 42m**
3. **TNG** (PI) 2025  
*GIARPS characterization of the super-puff transiting planet TOI-1420 b*  
Instrument: HARPS-N/GIANO-B, Telescope time: **12.1h**
4. **ESO/VLT** (Cycle P115, dPI) 2024  
*Breaking the chains of near-resonant systems*  
Instrument: ESPRESSO, Telescope time: **6h 18m**
5. **HST** (Cycle 32 & 33, CoI) 2024  
*FUV flux of nearby exoplanet host stars in the Ariel target list*  
Instrument: COS/G140L, 137 Snapshot Targets
6. **ESO/VLT** (Cycle P114, PI) 2024  
*Unruly mini-Neptunes: constraining the evolution of the very young transiting system TOI-1097*  
Instrument: ESPRESSO, Telescope time: **4h 38m**
7. **ESO/VLT** (Cycle P114, CoI) 2024  
*Planet evolution in- and around the desert: measuring masses of the young Neptunes orbiting TOI-942*  
Instrument: ESPRESSO, Telescope time: **28h 23m**
8. **ESO/VLT** (Cycle P114, dPI) 2024  
*Vanishing Worlds: Comparative Study of Atmospheric Mass Loss of Two Very Young Neptunes*  
Instrument: CRIRES, Telescope time: **6h 50m**

- |   |      |
|---|------|
| 9. <b>Gemini-North</b> (Semester 2024A, CoI)  | 2024 |
| <i>How do resonant planetary chains form and survive?</i>   |      |
| Instrument: MAROON-X, Telescope time: <b>7h 30m</b>   |      |
| 10. <b>JWST</b> (Cycle 3, CoI)  | 2024 |
| <i>Contextualising our solar-system: Atmospheric characterization of the Jupiter-analogue Kepler-167e</i> |      |
| Instrument: NIRISS, Telescope time: <b>39h 16m</b> [ADS]  |      |
| 11. <b>ESO/VLT</b> (DDT P112, dPI)  | 2024 |
| <i>How do resonant planetary chains form and survive?</i>   |      |
| Instrument: ESPRESSO, Telescope time: <b>5h 12m</b>   |      |
| 12. <b>ESO/VLT</b> (Cycle P112, PI)   | 2023 |
| <i>Unruly Neptunes: constraining the evolution of the very young transiting system TOI-942</i>            |      |
| Instrument: ESPRESSO, Telescope time: <b>7h 15m</b>   |      |
| 13. <b>ESO/VLT</b> (Cycle P112, dPI)  | 2023 |
| <i>Vanishing Worlds: Comparative Study of Atmospheric Mass Loss of Two Very Young Neptunes</i>            |      |
| Instrument: CRIRES, Telescope time: <b>12h 45m</b>  |      |

## CONFERENCES AND WORKSHOPS

### INVITED TALKS

- |  |             |
|--|-------------|
| 1. <b>Notti d'Estate</b> (Arcetri, ITA)  | 22 Jul 2025 |
| <i>Characterisation of exoplanet atmospheres with Ariel: scientific and technological challenges</i>         |             |
| 2. <b>First PLATOSpec science workshop</b> (Ondřejov, CZ)  | 22 May 2025 |
| <i>Know Thy Star, Know Thy Planet: PLATOSpec's Crucial Context for the Ariel Survey</i>                      |             |
| 3. <b>ESO: Stellar Coffee</b> (Garching, GER)  | 10 Jun 2024 |
| <i>Summoning the Science Simulators Applied to the Ariel Space Mission</i>                                   |             |
| 4. <b>MIAPbP: Habitability: the astrophysical, atmospheric, and geophysical implications</b> (Garching, GER) | 4 Jun 2024  |
| <i>An overview of the Ariel simulators framework and the Ariel Data Challenge 2024</i>                       |             |

### ORGANISATION

- |   |                |
|---|----------------|
| 1. Convener and Chair at <b>Europlanet Science Congress</b> (Helsinki, FIN)                               | 7–12 Sep 2025  |
| <i>Future and current instruments to detect and characterise extrasolar planets and their environment</i> |                |
| 2. Convener and Chair at <b>Europlanet Science Congress</b> (Berlin, GER)                                 | 8–13 Sep 2024  |
| <i>Future and current instruments to detect and characterise extrasolar planets and their environment</i> |                |
| 3. SOC member at <b>Ariel-IT Science</b> (Palermo, ITA)   | 20–22 May 2024 |
| <i>4th Meeting of the Italian community dedicated to Ariel's scientific preparation</i>                   |                |
| 4. Convener at <b>NeurIPS – Ariel Data Challenge</b> (San Diego, USA)                                     | 2–7 Dec 2025   |
| <i>Extracting exoplanetary signals from the Ariel Space Telescope</i>                                     |                |
| 5. Convener at <b>NeurIPS – Ariel Data Challenge</b> (Vancouver, CAN)                                     | 10–15 Dec 2024 |
| <i>Extracting exoplanetary signals from the Ariel Space Telescope</i>                                     |                |

### SELECTED TALKS

- |   |                |
|---|----------------|
| 1. <b>Europlanet Science Congress</b> (FIN)   | 7–12 Sep 2025  |
| <ul style="list-style-type: none"> <li>• <i>The Atmospheric Remote-sensing Infrared Exoplanet Large-survey (Ariel) sensitivity and performance</i></li> <li>• <i>ExoNAMD: a community tool to gauge multi-planetary systems</i></li> </ul>        |                |
| 2. <b>Detection and Dynamics of Exoplanets</b> (Coimbra, PO)  | 7–11 Jul 2025  |
| <i>ExoNAMD: a community tool to gauge multi-planetary systems</i>   |                |
| 3. <b>Chianti Topics</b> (Florence, ITA)  | 3–6 Jun 2025   |
| <ul style="list-style-type: none"> <li>• <i>Ariel-IT end-to-end exercise from the astrophysical scene to planetary spectra: simulations and retrieval</i></li> <li>• <i>ExoNAMD: a community tool to gauge multi-planetary systems</i></li> </ul> |                |
| 4. <b>Ariel Consortium Meeting</b> (Leiden, NL)   | 8–11 Apr 2025  |
| <ul style="list-style-type: none"> <li>• <i>Ariel S2MD: working group update (plenary)</i></li> <li>• <i>An end-to end experiment on a small sample of targets: simulations and retrieval</i></li> </ul>  |                |
| 5. <b>Ariel Consortium Meeting</b> (Lisbon, PO)   | 28–30 Oct 2024 |
| <i>Ariel S2MD: working group update (plenary)</i>   |                |

6. Europlanet Science Congress (Berlin, GER)	8–13 Sep 2024
<i>The Atmospheric Remote-sensing Infrared Exoplanet Large-survey sensitivity and performance</i>	
7. SPIE Astronomical Telescopes & Instrumentation (Yokohama, JP)	16–21 Jun 2024
<i>The atmospheric remote-sensing infrared exoplanet large-survey (Ariel) sensitivity and performance</i>	
8. Ariel-IT Science (Palermo, ITA)	22 May 2024
<i>Updates on Ariel simulations and detrending</i>	
9. Ariel Consortium Meeting (Tartu, EST)	23–26 Apr 2024
<ul style="list-style-type: none"> <li><i>Ariel S2MD: working group update (plenary)</i></li> <li><i>Updates on Ariel performance analyses</i></li> <li><i>Ariel long-term detrending</i></li> </ul>	
10. Ariel Consortium Meeting (Budapest, HUN)	24–27 Oct 2023
<i>Breakthrough in Ariel jitter detrending</i>	
11. ExoClock Annual Meeting (Thessaloniki, GR)	21–22 Oct 2023
<ul style="list-style-type: none"> <li><i>The Ariel mission and population studies</i></li> <li><i>A vanilla introduction to jitter detrending for Ariel</i></li> </ul>	
12. Ariel Science Ground Segment Workshop at ESAC (Madrid, ES)	12–14 Sep 2023
<i>Ariel Exposure Time Calculator (ETC) Status and Plans</i>	
13. Ariel Consortium Meeting (Tenerife, ES)	6–9 Jun 2023
<i>Ariel Reconnaissance Survey Targets: Detection of Molecules and Promotion to Higher Tiers</i>	
14. Ariel-IT Meeting (Palermo, ITA)	16–18 May 2023
<ul style="list-style-type: none"> <li><i>Ariel Reconnaissance Survey Targets: Detection of Molecules and Promotion to Higher Tiers</i></li> <li><i>The ExoClock Project: an open platform for maintaining the Ariel target ephemerides</i></li> </ul>	
15. Disks and Planets across ESO Facilities (Garching, GER)	28 Nov–2 Dec 2022
<i>Detecting molecules in Ariel low resolution transmission spectra</i>	
16. Ariel Consortium Meeting (Bologna, ITA)	10–12 Oct 2022
<i>Ariel PSF sampling analysis with PAOS</i>	
17. Ariel Consortium Meeting (Paris, FR)	14–17 Jun 2022
<i>Ariel Tier 1 population analysis</i>	

## TEACHING EXPERIENCE

1. <b>Co-Advisor</b> – Syty, A. (Paris-Saclay University)	2024
Research project: <i>Detrending techniques for the Ariel space mission</i>	
2. <b>Co-Advisor</b> – Polci, A. (Sapienza University of Rome)	2023–2024
M.Sc. thesis: <i>Exoplanet observations through the lens of the Fisher information formalism</i>	
3. <b>Co-Advisor</b> – Syty, A. (Paris-Saclay University)	2023
Research project: <i>Line of sight jitter detrending techniques for the Ariel space mission</i>	
4. <b>Co-Advisor</b> – Carrarini, T. (Sapienza University of Rome)	2023
M.Sc. thesis: <i>Transit spectroscopy with the James Webb Space Telescope: the impact of noise and saturation</i>	
5. <b>Tutor</b> – Hall, H. (ESA Mission Performance Engineering YGT)	2022–2023
Research project: <i>Linear drift creation and detrending in presence of pointing jitter</i>	
6. <b>Co-Advisor</b> – Altamura, L. (Sapienza University of Rome)	2022
M.Sc. thesis: <i>Pointing jitter noise reduction in HD209458 out-of-transit observation</i>	
7. <b>Co-Advisor</b> – D'Alessandro, A. (Sapienza University of Rome)	2021
M.Sc. thesis: <i>Phase-resolved spectroscopy with EXCITE for exoplanet atmospheric characterization</i>	
8. <b>Co-Advisor</b> – Masciulli, C. (Sapienza University of Rome)	2021
M.Sc. thesis: <i>Synergies and complementarities between JWST and EXCITE</i>
